

Mosaic Freeschool is seeking an experienced **High School Science** instructor to join our team for the 2022-2023 academic year. We are an education center serving homeschooled students in Central NJ. Our program meets in person one day/week for 30 weeks throughout the academic year, September through May. We are seeking an individual that can develop and lead a **Conceptual Physics** (or physical science) class for a small group of students, ages 14-16. The ability to teach across other areas of high school science is strongly desired, as is the ability to collaborate effectively with other educators to develop future classes. NJ teaching certification is not required.

The ideal candidate may or may not come from a traditional teaching background but *must*:

- have proven success teaching high school physics or physical science and conducting hands-on activities and science labs with students
- have a genuine passion for and command of the subject matter
- possess excellent communication skills with students and peers
- deliver project-based, student-centered, differentiated instruction
- be an intellectually curious, lifelong learner that desires to take their teaching practice in innovative directions

To apply please submit your resume & a cover letter to jayne@mosaicfreeschool.com
