

Mosaic Freeschool is excited to be developing a Community **Makerspace**! We are an education center serving homeschooled students in Central NJ. Our program meets in person one day/week for 30 weeks throughout the academic year, September through May. Our Makerspace will offer programming for homeschooled students during the day on Mondays and Wednesdays as well as after-school enrichment, camps, and workshops to all students in the community.

Makerspaces foster innovation and challenge children to learn through creative, hands-on experiences. As we embark on our journey this year to develop a Makerspace plan, acquire supplies and equipment, and identify projects for students, we are seeking individuals that have the expertise and desire to contribute to this effort.

If you are a maker, a craftsman, artist, tinkerer, techie, inventor, or STEAM educator that would like to help us develop our Makerspace and/or offer a project-based experience for our students, please reach out - we would love to collaborate with you!

Please submit inquiries along with your resume & a cover letter to jayne@mosaicfreeschool.com
